Impulse

Δp (“Impulse”) is Colgate’s community for Inclusivity in STEM. Our mission is to celebrate, support, and amplify the voices of people who are traditionally ignored in the STEM. Impulse is the term in physics that describes a change (Δ) in momentum (p). As a group that aims to change the way that STEM communities treat diversity, we collectively agreed this name positively represents those interests.

Please join us for an informational meeting
Friday, 9/8 at 1:00 p.m. in Ho 238.
